

Major in Sustainable Development and Global Quality Management

The Major in Sustainable Development and Global Quality Management considers the managerial entrepreneurship in the perspective of a business «*as unusual*»; it combines organizational excellence, through the application of quality principles and best practices, together with a far greater emphasis on business sustainability assessments.

Sustainable development is one of the most vibrant current topics in business; it is undoubtedly becoming the trend of business operation and development. Business is part of the sustainable development solution, while sustainable development is an effective long-term business growth strategy. But **good governance** is needed to make business a part of the solution: transparency and accountability are further challenges for business, especially in today's information-driven, globalised world. This major reviews foremost methods and tools of these fields.

Objectives

- To integrate **transversal approach** of quality in any corporate project;
- To develop an understanding of the environmental issues and risks;
- To become a **leading business advocate** on sustainable development;
- To comprehend **the business contribution** to sustainable development solutions and practices;
- To understand and apply Sustainable Development **governance and social responsibility** principles.
