

Master in Management Program Sustainable Development and Quality Management

- ➔ Become a manager with an expertise in environmental issues and risks and apply Sustainable Development governance and social responsibility principles!

Objectives of the program

The ultimate objective of this master's degree is to allow students to acquire a double competence in integrated systems management and organizational performance management (QSE) and a training integrating all aspects of sustainable development and CSR based on project management.

Our students are trained to be committed and responsible managers and executives. They are also able to manage projects and lead teams.

The students will thus be able to develop, implement and monitor environmental, quality and health & safety management systems and CSR approaches in organizations of all sizes and in all sectors of activity with a systemic vision integrating the risks.

8 reasons why this Master is the right choice for you:

- To integrate transversal approaches of quality and risks in any corporate project;
- To develop an understanding of environmental issues and risks;
- To become a leading business advocate on sustainable development;
- To understand the organizations contribution to sustainable development solutions and practices;
- To understand and apply Sustainable Development governance and social responsibility principles.
